## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, "by supplying a mixed gas including C<sub>5</sub>F<sub>8</sub>, O<sub>2</sub>, CH<sub>2</sub>F<sub>2</sub>, Ar and CO at approximate combination of the gas components" is indefinite. It is unclear if the mixed gas includes all of the gas components listed or a combination of gas components not including every component listed.

### ***Allowable Subject Matter***

3. Claims 1-4, 6-21 are allowed.
4. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
5. The following is an examiner's statement of reasons for allowance: The cited prior arts fail to disclose or suggest the step of forming a first hole by transversely expanding the preliminary hole in the second insulating layer, wherein an etch stop layer and first insulating layer position below the second insulating layer in conjunction with all other limitations in the claim. The closest prior art (Lou US 6,174,769) teaches

to form the first and second hole using dual damascene process without the need of transversely expanding the size of the hole.
